## Capabilities Statement

---

Founded in 2007, Decibel Event Management is an event management and production firm. Our reach and our talents, however, are boundless. We offer best-in-class, full-service event management and planning solutions for the world's leading brands. At Decibel Event Management, we take your grand visions, your hey-is-this-even-possible harebrained concepts, and hell, even your half-baked ideas hastily scrawled on a cocktail napkin and bring them to life as well-planned, well-structured events.

At Decibel Event Management we create stunning live events, but we do more than just manage events. We create experiences, images, and atmospheres. From corporate keynotes to political rallies, from large-scale installations to conferences, Decibel does it all. We Founded dB Management to provide management for live events and advanced graphics services. These services include Event Management, Event Creative, Event Planning, Event Production, Virtual Events, Tradeshow Design, and Fabrication among many others!

## Core Competencies

---

- Event Management
- Event Creative
- Event Planning

- Virtual Events
- Tradeshow Design and Fabrication
- Mobile Marketing Tours and Vehicle Fabrication
- Political Advance

## Differentiators

---

Our team at Decibel Event Management brings a producer/director mindset and planning element to your event productions-building and executing your event to bring your vision and message to the correct audience. Our team has also never exceeded a fixed price contract (without a change in scope) in our history- something that is a rarity in live event production.
